

# FlightgearBackup backup script for Flightgear (1.0)

---

Creates a backup of your Flightgear folders

Official support sites: [Official Github Repo](#) - [Official Forum](#) - [Official Download Area](#)

1. Edit the settings at the top of flightgearbackup.pl if needed
2. create a cron job like this:

```
1 1 * * * /home/flightgear/FlightgearBackup/flightgearbackup.pl
```

3. This will back up your Flightgear installation at 1:01am each day, and keep the last 5 backups.
